

Index to Volume 75

January to December 1970

The articles and references compiled in this index have been listed alphabetically. A subject related to a major topic has been listed under the major topic. For example, an article dealing with a new coal cleaning method will be found under the topic, "Preparation." An article on shuttle cars will be found under "Haulage."

Unclassified articles, or those that cannot be placed in any major category, have been listed within the index alphabetically. Editorials, marked (E), will be found under the subject with which they are concerned. Modified, or descriptive, rather than actual titles are used for the majority of articles.
